DEPCOM Power, Inc. (DPI) Site Kick-Off Checklist

The purpose of this document is to provide a Site Kick-Off Checklist for the Site Quality Manager to ensure that they are set up with the best chances of Success.
Feel Free to put a check in the box.

- ☐ Get Involved in the Pre-Construction Meetings
  - ☐ Review the schedule alongside of the Project Manager (PM) & Construction Manager (CM) to ensure that we're allowing time for Quality & Establish a good relationship with both parties.
  - ☐ Communicate items such as: Special client needs, staffing levels, work hours, vehicle allotments, and communication processes.
- ☐ Obtain & Learn the Engineering Procurement & Construction (EPC) Agreement. (AKA "The Contract")
  - ☐ Look for what is required of DEPCOM as far as inspection documentation.
  - ☐ Understand what deliverables we must supply the owner with.
  - ☐ Ensure you always have a hard copy on hand.
- ☐ Obtain & study the site drawings.
  - ☐ Schedule a Page Turn with the team to understand the requirements to the site.
- ☐ Obtain & study the manufacturer's installation guides.
  - ☐ Ensure you always have a hard copy on hand.
- ☐ Update the Site Quality Manual to meet site specifications.
- ☐ Update the Inspection Test Plan (ITP) to match the site specifications.
- ☐ Meet with Safety to understand site-specific safety requirements.
- ☐ Meet with the Field Engineer (FE) and ask to be included on all Request for Information (RFI's), Submittals, Change Orders, and updated drawings.
- ☐ Ensure you have the correct tools for your job.
- ☐ Set up storage and calibration logs for the tools.
  - ☐ Understand the calibration requirements for the job site.
- ☐ Set up the project folder structure in Viewpoint for Projects for offsite storage of reports, inspections, NCR's and other documents.
- ☐ Meet with the Logistics team to understand the delivery schedules for major components.
- ☐ If your job requires physical copies of the job books, work with the FE to ensure that you have an allotted area and understand what is required.

- ☐ Obtain All Subcontractor's installation procedures for the components of your site. Compare them to the Installation Guides of the Component Manufacturers to ensure compliance.
- ☐ Meet with Structural/Civil/Electrical Team to discuss quality standards, inspection criteria, and turnover processes.
- ☐ Establish a weekly meeting with the Subcontractor's Quality managers to ensure quality items are communicated.
