DEPCOM POWER // A KOCH ENGINEERED SOLUTIONS BUSINESS	Document #	Title	Revision	Released
	DPI-QA-SOP-0007	**Documented Information**	04	**12/16/2025**

Originator	Approver
Melody Baeza, Quality Manager, QMS	**Elijah Richardson, Senior Quality Manager**

1. Purpose

The purpose of this document is to ensure that all documented information (procedures, standard work instructions, forms, records, etc) within the Quality Manager System (QMS) is properly controlled. Effective document and version control helps users reliably find the most up-to-date procedures, documents, and templates while maintaining compliance with customer, regulatory, and company requirements.

2. Scope

This procedure applies to all documented information within the scope of the QMS including all processes from business development through project close out, warranty, and services.

3. Controlled, Version-Controlled, and Uncontrolled Documents

3.1. Controlled documents – Company-level documents that apply organization wide

- **Purpose:** Ensures integrity, traceability, and protects documents from unauthorized changes
- **Requirements:** Named with unique document ID in Section 5. Goes through formal review, approval, and distribution process in Section 6
- **Location:** Most up to date versions are available in the Company Level Documents folder on DEPCOM Net SharePoint site and Company Level Procore Documents Tool
- **Examples:** Standard Operating Procedures, Standard Work Instructions, Inspection Templates

3.2. Version controlled documents – Project-level documents that are specific to one project

- **Purpose:** Users can identify if they are using the current version
- **Requirements:** Versions are clearly identified, and changes are tracked over time.
- **Location:** Latest versions are available in the project specific folder on DEPCOM Net SharePoint site and Project Level Procore Documents Tool
- **Examples:** Project ITPs, Schedules, Drawings

3.3. Uncontrolled documents – used for reference, no guarantee they are current or accurate

- **Purpose:** Reference documents that may not be the most up to date versions
- **Requirements:** Named with *Date – Description* convention in Section 7 – using the date as first part of the file name identifies the most recent document updates. There is no review, approval, or distribution process. No version control is required.
- **Location:** Documents are available in the project specific folder on DEPCOM Net SharePoint site and Project Level Procore Documents Tool
- **Examples:** Customer provided documents, Vendor provided documents, Training Materials

4. Document Level Designation

The Quality Manager System will contain two levels of documents.

	Company Level	**Project Level**
Purpose	Documents that apply to all projects	Documents that are specific to each project
Examples	Company-wide SOPs, Standard Work Instructions, Templates, Trainings, Corporate Quality Manual	Project drawings, schedules, contracts, permits, completed inspections, change orders
Storage Location	**1.** Company Level Documents Folder in DEPCOM Net SharePoint site **2.** Company Level Documents in Procore	**1.** Project folder in DEPCOM Net SharePoint site **2.** Procore Project Documents Tool
Level of Control	Controlled documents	Version Controlled documents
Access – folder permissions	Edit – QMS Team View - everyone	Edit – project team & corporate functions View - everyone

5. Roles & Responsibilities

ROLE	**RESPONSILITIES**
Originator	Draft/revise document, ensuring title, revision records, date, formatting, and required content
QMS Team/Document Control	**1.** Review document for compliance with documented information procedure **2.** Coordinate document approval **3.** Maintain master list of controlled documents
Department/Process Leader or Manager	**1.** Approve new and revised documents related to their function **2.** Ensure implementation and awareness
All Users	**1.** Always pull controlled documents from Company Level SharePoint folder **2.** Ensure all version controlled or reference documents are named using the Date – Description format

6. Controlled Document Creation & Identification

6.1. Document ID

- All controlled documents must have a unique document ID

Document ID consists of a combination of the following:

Type	Purpose	Code
Document Level Designation	Define if document is company level	DPI – company level documents
Department Designation	Identify which process the document supports	2-3 digit code – listed in table below
Document Type Designation	Identify what type of document	3 digit code – listed in table below
Numbering	Maintain unique document identifier	4 numerical digits, provided by QMS team – each department starts at 0001

The combination of *Document Level Designation + Department + Document Type + Number* becomes the unique Document ID.

- Department Designation
  Each department will use its own abbreviated code. Select an existing department from the table below or contact the QMS team.

Department	Code
Environmental, Health, & Safety	EHS
Human Resources	HR
Quality	QA
Business & Project Development	BD
Bidding & Estimating	BE
Procurement	PRC
Subcontracting	SUB
Logistics	LOG
In House Construction	IHC

Department	Code
Engineering	ENG
Project Delivery	PD
Commissioning	COM
Project Services	PS
Warranty	WRN
Operations & Maintenance Services	OM
Field Services Repowering+	FSR
Supply Chain Contract Management	SCM

- Document Type
  Select existing document type below or contact QMS team

Document Type	Code
Standard Operating Procedure	SOP
Standard Work Instruction	SWI
Inspection Test Plan	ITP
Reports	RPT
Training Materials	TRN
Drawings	DRW
Template	TMP
One Sheets	OS

Document Type	Code
Checklist	CKL
Logs	LOG
First Article Inspection	FAI
General QMS	QMS
Audits	AUD
Plan	PLN

6.2. In addition to a Document ID, documents should include the following (if applicable) to document:

- Standard Operating Procedures should include

    - Clear purpose and scope as the first sections
    - DEPCOM header template and SOP format – including origination date, revision, date, and name of approver
    - Detailed revision record
- Templates, Checklists, One Sheets, and other working documents should include the following at a minimum
    - DEPCOM branding
    - Revision Date

7. Process for Controlled Documents

7.1. Document Review and Approval

- To have a document added to the QMS, submit QMS Communication & Change Requests Form (link - QMS Change Request Form) with the document
- QMS Team will review document for compliance to documented information procedure, updated Master Document Matrix, and submit to relevant Department Leader for approval
- Once approved, the document will be added to the Company Level Documents folder

7.2. Control of Versions and Distribution

- Only the latest approved version of documents will be available in the Company Document folder
- Obsolete/old versions will be removed from the Company Document folder but will be maintained in the Master Document Matrix

7.3. Changes and Updates

- For document revision or update requests – submit QMS Communication & Change Requests Form (link - QMS Change Request Form) with revised document. Be sure to include details of changes made in the revision record at the bottom of the page

7.4. Document Review

- Documents will be reviewed every 2 years to confirm the document is still current

7.5. Obsolete Documents

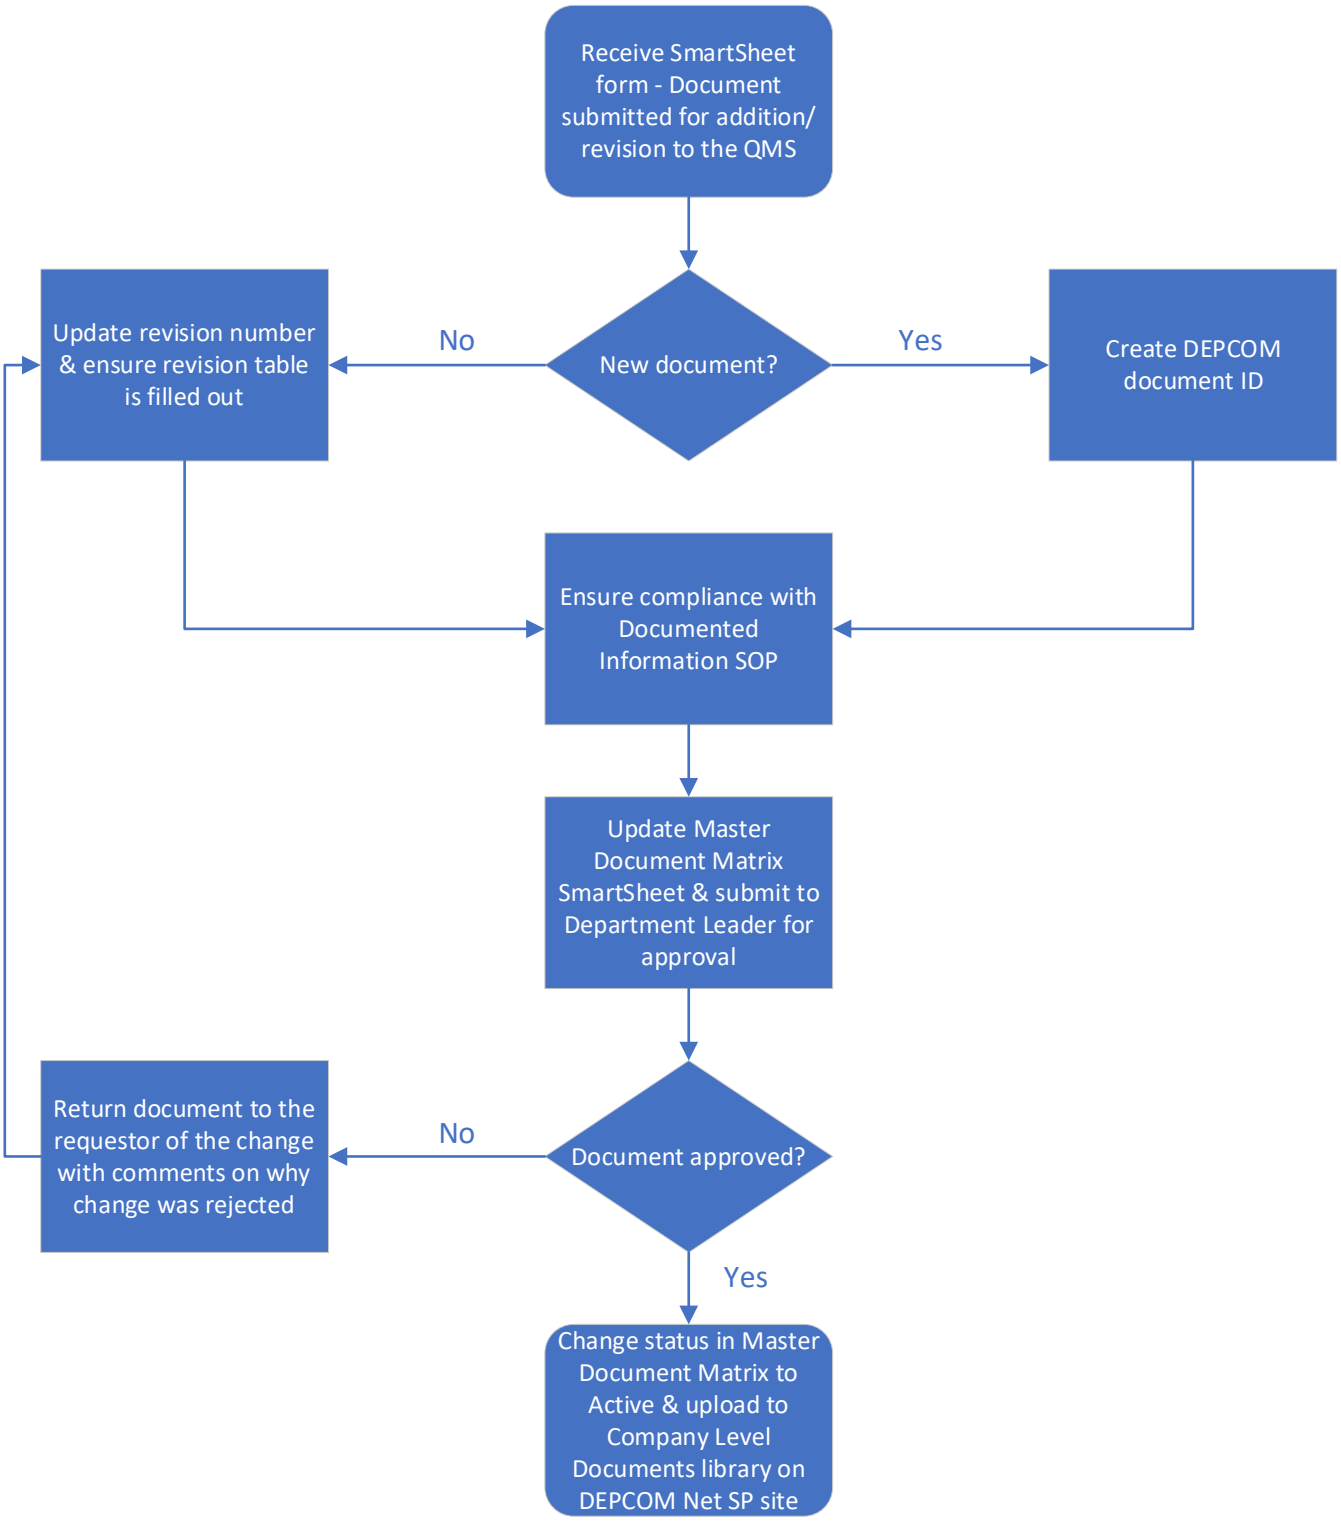

- When documents are determined to be obsolete, the files will be removed from the Company Level Document folder
- Files will be archived and marked as obsolete in the Master Document Matrix

8. Document Retention

8.1. Controlled documents that become obsolete will be maintained for at least 1 year in the Master Document Matrix

8.2. Version controlled project documentation will be maintained for the live of the EPC agreement including the fulfillment of all warranties. Projects folders may be moved into an archive folder once projects are completed

9. Document Change Process Flow

10. Revision Table

REV. #	REV. DATE	DESCRIPTION	APPROVER
00	9/10/2025	Initial Release	Elijah Richardson
01	10/3/2025	Added Audit type document	Elijah Richardson
02	10/29/2025	Added process flow	Elijah Richardson
03	11/12/2025	Add IHC as department	Elijah Richardson
04	12/16/2025	Add doc type Plan	Elijah Richardson
