DEPCOM POWER // A KOCH ENGINEERED SOLUTIONS BUSINESS	Document #	Title	Revision	Released
	DPI-QA-SOP-0021	**Creating an FAI or Inspection Template (Project Level) in Procore**	00	**11/7/2025**

Originator	Approver
Elijah Richardson – Sr. Quality Manager	**Jonathan Macdonald- Director, Quality**

1. Purpose

DEPCOM utilizes a set standard of inspection templates which are periodically reviewed by Subject Matter Experts (SMEs) in conjunction with the engineering department. These standard inspection templates reside within the **Procore Construction Management Software** at the **Company Level**. In certain instances, there may be a need to generate a new First Article Inspection (FAI) and inspection template to comply with contractual requirements, or applicable codes and standards.

2. Scope

This process will apply to all projects. Please note this process is also the same for both **Inspection Templates** and **First Article Inspection (FAI) Templates**.

3. Responsibilities

ROLE	RESPONSILITIES
QMS Team	Review change requests with SMEs for approval Maintain company-level inspection & FAI templates
Regional Quality Managers	Assist Site Quality Managers ensuring Templates for both inspections & FAIs are correct and complete.
Site Quality Managers	Create inspection FAI & Inspection templates in their projects Customize the templates to meet site specific requirements. Notify the QMS of creation

4. Procedure

4.1 **Creating an FAI or Inspection Template for the Project.**

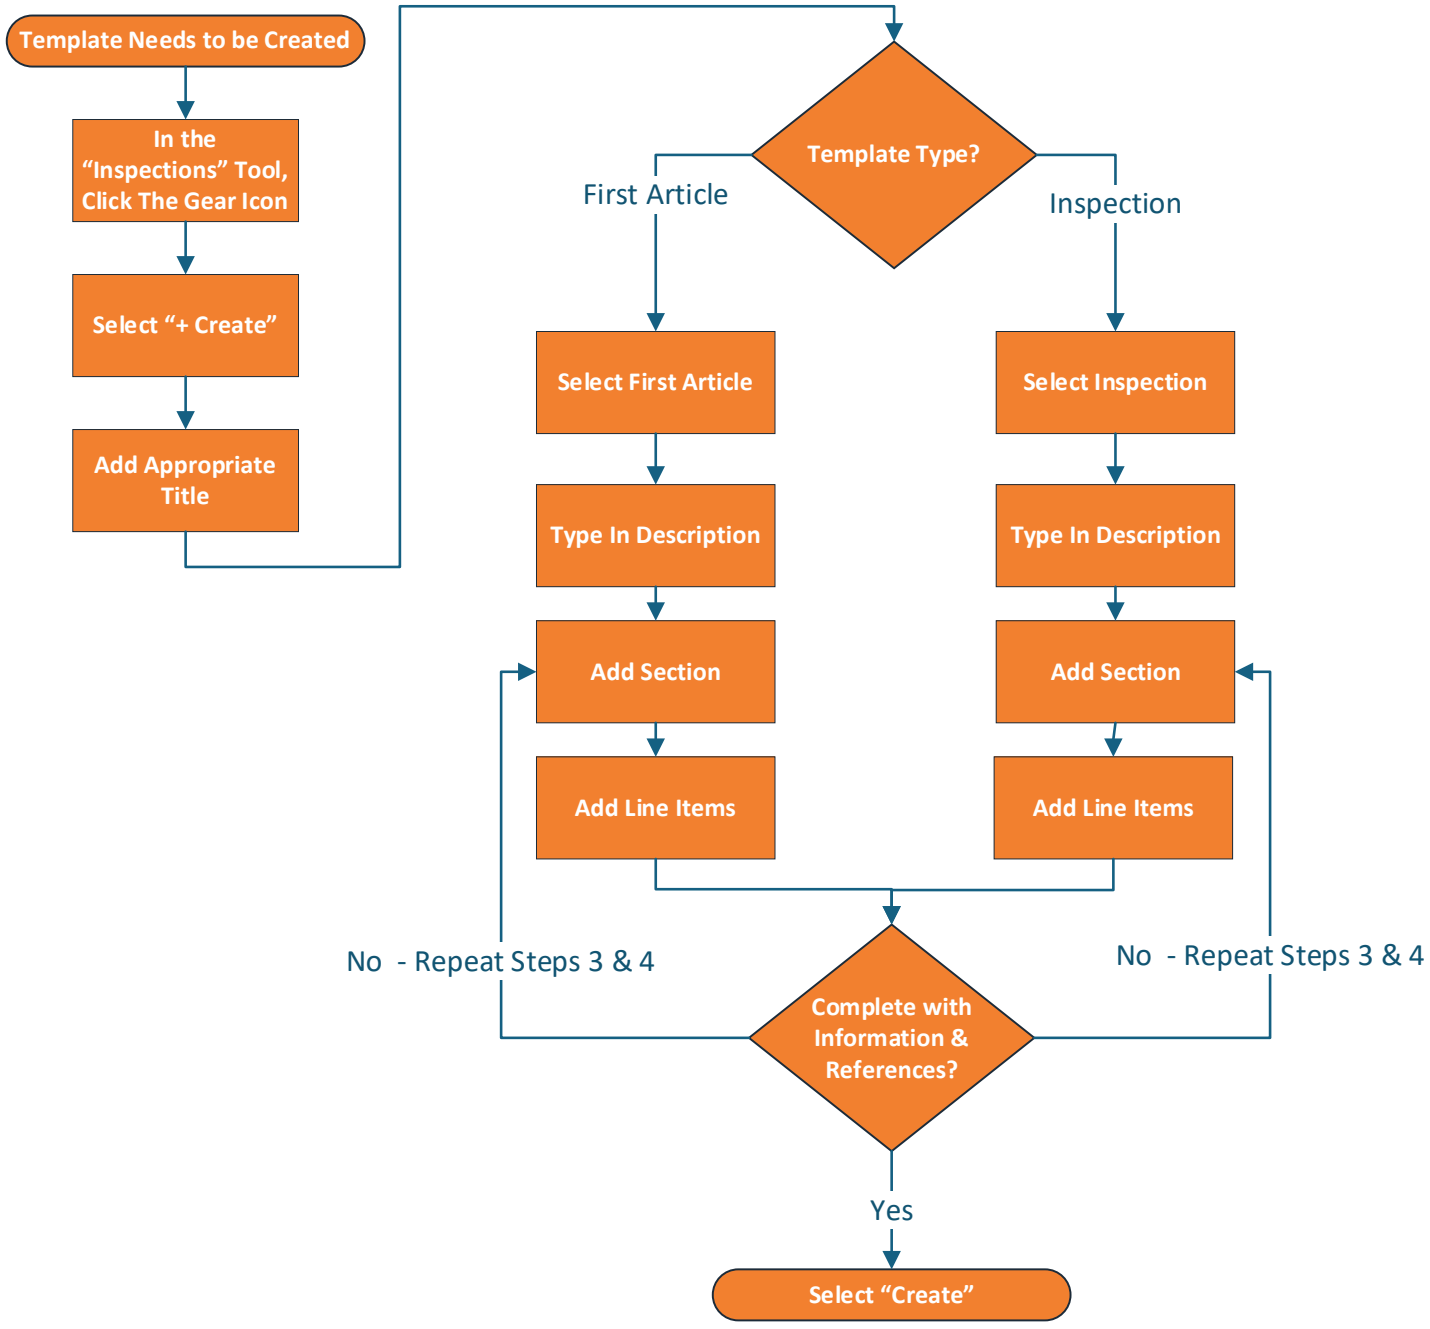

- Within Procore, ensure you are on the correct project home page
- Navigate to the "**Inspections**" tool and click.
- Click on the **gear icon** in the top left corner of the page.
- On the right side of the screen, select the "**+ Create**" button.
- Enter the type of the Inspection in the following: "_____ **Installation Inspection Report**" or ""_____ **First Article Installation Inspection Report**"
- Ensure that the selected "**Type**" is either "**Quality**", or "**First Article**" appropriately.
- Select the appropriate Trade from the drop-down menu.
- In the Description box, describe what the template will cover.
    - i.e. "This inspection report covers the installation of the Combiner Box Terminations."

- Please note: If you do not see the gear icon on the top left of the inspections tool, please contact your project coordinator and request admin permissions at the project level specifically on the Inspections Tool.

4.2 **Configuring a Project Level Inspection template or FAI Template.**

- If coming from the previous section in this document, please skip to item
- Within Procore, ensure you are on the correct project home page
- Navigate to the "**Inspections**" tool and click.
- Click on the **gear icon** in the top left corner of the page.
- Search for the desired template to be edited in the search box on left of the screen.
- Once you've identified the template, click "**Edit**"
- Scroll down to the bottom of the screen
- Select "**Add Section**" title the section with the appropriate name.
- Select "**Add Item**" if you would like to add an item that pertains to the component in that section, otherwise you may select "**Add Section**" to move to another section.
- Begin the line item with "**Verify the_____**" and continue with the criteria required.
- Ensure to Include specifications, when possible, in the "**Details**" box.
- Once you have added all line items required, **select the check box header** in the top left corner of the inspection window (Next to Title, Company Details, Details)
- Select "**Edit Require Observations On**"
- Select "**Fail**" & click out of the selection window.
- Select "**Update**".
- You may now go through and add drawing references, specifications, and other items.
- Once you have completed all items in the template, select "**Create**" at the bottom of the page.
- Please note: Some line items will require dimensions in the details column. These specifications could come from installation manuals, drawing sets, the EPC Agreement, or all three.
- Please note: ensure to work on **both** the **First Article Inspection & Inspection Template** at the same time to ensure that any adjustments & requirements are captured in both documents. For easy transfer of information, it is recommended you fill out one completely first, and on a separate monitor, copy and paste the same information into the appropriate line items.
